Investing in Green Energy. Strengthening Local Communities.

## LATEST NEWS

As of the end of May, we have 24 turbines producing power. Work is winding down on-site and we are only a few weeks away from having the project completed and operational.

As mentioned in our last newsletter, George Robson of Leminster has been named the project owners' representative for the wind farm. In 2013, George participated in the Wind Turbine Technician program at Holland College in PEI and came back to site to play a central role in the turbine assembly. He will be a key player in maintaining the turbines and will serve as the primary community contact beginning in July. Stay tuned for more details on how you can reach George.
